	PAT. NO.		Title
1	8,898,797	**T**	Secure option ROM firmware updates
2	8,898,792	**T**	Search mechanism for content based information security repositories
3	8,898,784	**T**	Device for and method of computer intrusion anticipation, detection, and remediation
4	8,898,782	**T**	Systems and methods for spontaneously configuring a computer network
5	8,898,774	**T**	Method and system for scanning a computer system for sensitive content
6	8,898,772	**T**	Methods and structure for implementing security in systems that utilize small computer system interface enclosure services
7	8,898,759	**T**	Application registration, authorization, and verification
8	8,898,755	**T**	Trusted internet identity
9	8,898,752	**T**	Efficiently throttling user authentication
10	8,898,751	**T**	Systems and methods for authorizing third-party authentication to a service
11	8,898,748	**T**	Remote verification for configuration updates
12	8,898,745	**T**	Node authentication
13	8,898,742	**T**	Systems and methods for controlling access to content distributed over a network
14	8,898,737	**T**	Authentication method for stateless address allocation in IPv6 networks
15	8,898,734	**T**	Analyzing security compliance within a network
16	8,898,732	**T**	Providing a managed browser
17	8,898,723	**T**	Virtual channel declarative script binding
18	8,898,714	**T**	Methods for identifying video segments and displaying contextually targeted content on a connected television

19 8,898,712 **T** Method and apparatus for receiving multimedia service and aiding the receipt of multimedia service

20 8,898,678 **T** Runtime optimization of an application executing on a parallel computer

21 8,898,677 **T** Data arrangement calculating system, data arrangement calculating method, master unit and data arranging method

22 8,898,671 **T** Processor that executes a plurality of threads by promoting efficiency of transfer of data that is shared with the plurality of threads

23 8,898,668 **T** Redeploying baseline virtual machine to update a child virtual machine by creating and swapping a virtual disk comprising a clone of the baseline virtual machine

24 8,898,662 **T** Method and device for generating software installation packet

25 8,898,661 **T** System and method for installing program

26 8,898,656 **T** Mechanism for facilitating dynamic format transformation of software applications in an on-demand services environment

27 8,898,640 **T** Exception handling for a distributed runtime

28 8,898,620 **T** System and method for application process automation over a computer network

29 8,898,581 **T** Display control device, display control method, search device, search method, program and communication system

30 8,898,580 **T** Definition for service interface

31 8,898,578 **T** Conference calls for social streams

32 8,898,576 **T** Product data management and workflow systems and methods

33 8,898,560 **T** Fixing problems with a user interface

34 8,898,559 **T** Method for encoding an XML-based document

35 8,898,558 **T** Managing multimodal annotations of an image

36 8,898,526 **T** Using forward error correction coding to diagnose communication links

37 8,898,505 **T** Dynamically configureable placement engine

38 8,898,497 **T** Negotiating a transmit wake time

39 8,898,491 **T** Power management IC having a power supply PWM that is controllable using either an analog or a digital feedback path

40 8,898,469 **T** Software feature authorization through delegated agents

41 8,898,451 **T** Method and system for monitoring encrypted data transmissions

42 8,898,448 **T** Hardware acceleration for WWAN technologies

43 8,898,416 **T** Storage allocation management in switches utilizing flow control

44 8,898,414 **T** Storage devices and methods of driving storage devices

45 8,898,412 **T** Methods and systems to selectively scrub a system memory

46 8,898,411 **T** Snapshot storage and management system with indexing and user interface

47 8,898,401 **T** Methods and apparatuses for improving speculation success in processors

48 8,898,399 **T** Locking and signaling for implementing messaging transports with shared memory

49 8,898,364 **T** Method, system, and bus coupler for exchanging data between a higher-level network and a lower-level network

50 8,898,354 **T** Methods and devices for synchronizing to a remotely generated time base
